NRIO PROGRAM UPDATES

School; Children; Youth and Adolescent Programs:

Dr. Andrew Wong is a Registered Psychologist within the areas of Clinical, School, and Rehabilitation psychology. He is currently a Staff Psychologist at the York Catholic District School Board where he provides assessment, counseling, and consultation services to best help students achieve success in school. Dr. Wong has brain injury experience and has worked in private sector rehabilitation and his individual practice. Dr. Wong speaks English and Cantonese.

Ms. Bandana Chopra is the School Resource Specialist, Clinic and School Manager and a registered member of the Ontario College of Teachers (OCT). Bandana is specialized in the Junior, Intermediate and Senior divisions and has obtained her Special Education qualifications. She has a strong background working with students and adult learners with diverse learning problems. In addition to being proficient with core curricula, she has extensive experience working with children, adolescents and adults with unique learning problems related to brain injury.

NRIO's Physiotherapists, Occupational Therapists, Speech Therapists, Teacher and Psychologist have experience and the expertise in working with the school age population and can offer a comprehensive program to meet each child's needs.

Short-term Residential /Supported Living Apartment Programs:

With the changes in Auto Insurance Benefits effective June, 2016, NRIO's residential programs can provide the family, hospital team, clinical team, case managers, insurers and lawyers with a short-term program until the discharge environment is ready. During this stay, the NRIO team will complete the required assessments to assist in the process of catastrophic determination as well as to identify the community based therapy services needed by the person. The NRIO Short Term programs can provide rehabilitation program based on best practices and the outcomes needed to maximize long term benefits.

Group Day Programming:

NRIO provides group day programming every Monday, Wednesday and Friday with a focus on life, social, executive functioning and communication skills, as well as Music Therapy in a fun and interactive therapeutic recreational environment following best practices. Please see monthly calendar on website for details.

NRIO's other programs include multi-disciplinary, brain injury rehabilitation in the clinic, community, hospitals, schools, in-patient residential, apartment living, coma stimulation, day programs and group programs. NRIO also has access to a Neuropsychiatrist, Physician with Substance Abuse expertise and a Behavioural Therapist for inpatient, residential clients.
